17.0	HVAC ELECTROSTATIC DRY SCRUBBER FOR KITCHEN EXHAUST OF 3600 CFM.									

						RA - 1	(Current Bill)	V.	ARIATION	
Je	DESCRIPTION	UNIT	PO QTY	PO RATE (Rs)	PO AMOUNT (Rs)	QTY	AMOUNT (Rs)	QTY	AMOUNT (Rs)	REMARK
	Supply, installation, testing & Commissioning of Electro- Static DRY scrubber for the above exhaust rating of 3600 CFM. The vendor shall include the Pressure drop to be 20mm Wg, works with necessary valve arrangement. The scope of supply should include complete system for Electrostatic Dry scrubber operation. It shall also include the carbon filters for residual carbon content removal. The Electrostatic Air Cleaners shall be supplied as a onepiece factory joined assembly of individual section(s) selected to treat oil mist, smoke, fume, grease & dust/ powder problems.									
	Housing shall be constructed with minimum 1.6mm thick steel sheet with reinforced structure & powder coated to protect against rust and corrosion. It shall have a hinged door for cell access, located one side of the unit. The door shall be gasketed to prevent air leakage. There shall be a safety interlock switch to cut off primary supply when the access door is opened. The external finish shall be a durable industrial grade semi-gloss epoxy-polyester coating suitable for outdoor installations.									
	ionizing-Collecting cell(s) shall be of one-piece construction 13.38" (340mm) deep in direction of airflow. The dimension of the collection cell shall be 18.89" (480mm) H x 19.76" (502mm)W Max. All support framing, end plates and ionizer ground electrodes shall be 0.080 inch (2mm) thick aluminum. Both repelling and collector plates shall be 0.032 inch (0.8mm) thick aluminum alloy material rigidly retained in place with tubular spacers and tie rods. Each plate shall be corrugated, perpendicular to airflow direction. Spacing between plates shall be no less than 0.318 inch (8mm). Each cell shall weigh at least 17 kg with at least 8 stainless steel spiked blade ionizers. Tungsten wire ionizers will not be accepted									J

It shall also include the carbon filters for residual carbon content removal. The Electrostatic Air Cleaners shall be supplied as a onepiece factory joined assembly of individual section(s) selected to treat oil mist, smoke, fume, grease & dust/ powder problems.								
	Housing shall be constructed with minimum 1.6mm thick steel sheet with reinforced structure & powder coated to protect against rust and corrosion. It shall have a hinged door for cell access, located one side of the unit. The door shall be gasketed to prevent air leakage. There shall be a safety interlock switch to cut off primary supply when the access door is opened. The external finish shall be a durable industrial grade semi-gloss epoxypolyester coating suitable for outdoor installations.

								onizing-Collecting cell(s) shall be of one-piece construction 13.38"
								(340mm) deep in direction of airflow. The dimension of the
								collection cell shall be 18.89" (480mm) H x 19.76" (502mm) Max.
								All support framing, end plates and ionizer ground electrodes shall be 0.080 inch (2mm) thick aluminum. Both repolling and collector
								be 0.080 inch (2mm) thick aluminum. Both repelling and collector plates shall be 0.032 inch (0.8mm) thick aluminum alloy material
								harces shark be excess then foreign the samming alloy materials highly retained in place with tubular spacers and tie rods. Each
								plate shall be corrugated, perpendicular to airflow direction.
							1	Spacing between plates shall be no less than 0.318 inch (8mm).
								Each cell shall weigh at least 17 kg with at least 8 stainless steel
								spiked blade ionizers. Tungsten wire ionizers will not be accepted
								Ionizing spiked blade shall be made of Stainless steel 304 material
							1.	rigidly supported both vertically and laterally. Spiked ionizer t
								ground electrode spacing shall be 1.0" (Z5mm). High voltag
							þ	support insulators shall be of Teflon material for dielectri
								strength.
							12	Equipment should be selected on the basis of required Air handlin
							1	capacity so as to achieve 90-95% particulate matter remove this particiency according to DOP Test or EN779 European standa
								(Equivalent to ASHRAE 52.1). Vendor should submit the Test repo
						1	- 1	from the Lab having Test facility according to ASHRAE 52.2
							1.	EN779. In the absence of Test report Vendor should demonstra
							eir	the efficiency claim at their manufacturing facility at the
								exbeuzes.

05'0 %05	l			ı		Supply , installation , Testing & Commissioning of Electro-static Dry Scrubber unit complete with all sections as listed above & detailed in tender drawings	
						BMS (Building Management System) interface: The power supply (pack) shall have a 2 wire dry contacts (NO/NC) for remote link to Building Management System. This is for performance indication of the air cleaning system	
						There shall be 2 LED lights (Green & Red) installed on the access door of the unit to indicate the status of the air cleaning system	
						The power pack shall incorporate a short circuit arc protection with automatic power restoration system to prevent overload.	
						Power supplies shall be 100% solid state, operate on 230 VAC, 50 Hz, 1 Phase input and provide a dual high voltage output of 12-13 KVDC for the fonizer and 6.0-6.5 KVDC for the collector in normal operation conditions. Current output at the high tension shall be 120 watts to maintain the specified collection efficiency. Integrally mounted Electrical interlocks shall be provided to prevent access to the high voltage components without first interrupting the primary input power. The power supply shall operate over a temperature range of -32 degrees F to 140 degrees F, be overloaded self-protecting and accommodate an LED lights indicating the performance status of the ionizing/collecting cell. High voltage output components in the power supply shall be sealed with epoxy for moisture resistance.
