CIN: U55209DL2022PTC401030

Regd Office: 504, Regus, Level-5, Caddie Commercial Tower, Hospitality District, Aerocity, New Delhi-110037

Corporate Office: Block A, South Wing, 1st Floor, Shiv Sagar Estate, Dr. Annie Besant Road, Worli, Mumbai-400018

Tel No: (+91-22) 43224322

SEMOLINA KITCHENS PRIVATE LIMITED

- You should have enough qualified, trained and experienced staff to handle the testing jobs
- You shall Have adequate infrastructure, equipment facilities to perform the tests
- You should response immediately in case of emergency during any analysis required regarding food poisoning incident investigation or failure of any critical test parameter result. There should be an authorized and competent person from the laboratory end who will response to immediate action.

Laboratory sampling requirement:

- Sampling should be performed by trained & technical person.
- Food sampler should be in proper PPE (apron, hand gloves, cap, nose mask), should carry IPA (70%) solution & appropriate tools for sample collection like clean, dry, leak-proof, wide-mouthed and sterile containers such as plastic jars or stainless metal cans, sterile nasco bags, swab stick, ice pack, insulated box etc.
- Sampling date, time, description of the sample like name, manufacturing date, quantity, storage condition etc, sampling location, food sampler name should be recorded properly & duly signed by both the parties.
- If you do not comply with the above parameters the Contract can be terminated immediately as per our sole discretion.

Laboratory sampling procedure

- Food sample must be provided to the laboratory in it's actual pack size & sealed condition. If products are in bulk or in containers too large for submission to the laboratory, transfer representative portions to sterile containers under aseptic conditions.
- Clean, dry, leak-proof, wide-mouthed and sterile containers such as plastic jars or stainless metal cans of a size suitable for sample of the product or sterile nasco bags must be used.
- Take care not to overfill bags/containers or permit puncture by closure.
- Ask food sampler to deliver samples to the laboratory promptly with the original storage conditions maintained as nearly as possible.
- Ask food sampler to transport frozen or refrigerated products in approved insulated container with ice pack so that they will arrive at the laboratory unchanged.
- Dry or canned foods that are not perishable and are collected at ambient temperatures need not be refrigerated.
- Do not freeze refrigerated products.
- Swab sample to be collected through swab stick from 5cm x 5 cm square area (Approx) from food handler hand or from equipment.
- Ice sample to be collected in sterile container through sterile ice scoop and to be transferred immediately in approved insulated box.

Microbiology (3): E-Coli, Total Coliforms

Testing of Drinking Water: Basic Parameters

Chemical Analysis (13): Colour, Odour, Fluoride as F, Turbidity, pH, Conductivity, Total Hardness as CaCO₃, Iron as Fe, Chloride as Cl, TDS, Total Alkalinity as CaCO₃, Calcium as Ca, Magnesium as Mg, Nitrate as NO₃, Sulphate as SO₄.

Microbiology (2): Coliform, E.coli.

Testing of Ice Cubes (3) : Total Plate count, E.coli and Total coliform

1. Water full parameter - **Twice a Year**
2. Water basic parameter - **Twice a year**
3. Ice cube - Basic parameter - **Twice a year**
4. **Food Sampling: - 20-22 sample / month**
5. **Swab Test :- 20-22 sample /month**

Sample collection details:

Sample collection details will be intimated on monthly basis by the QA department. The date will be decided by department and samples to be collected before 3pm of the mentioned date. Two numbers of insulated boxes with ice packs have to be provided for sample collection. The collected sample must reach lab within 1 hour of collection and processing should be carried on the same day. Reports to be shared within 7 days of sample collection via mail and hard copies to be submitted during submission of bill. Sterile Swabs to be handed over in advance to QA department (100
