Hello,

Please find attached photo showing the artwork of the signage supports with various options.

Thank you

On Mon, 21 Aug 2023, 17:27 Marcon Signage, <[marcondisplay@gmail.com](mailto:marcondisplay@gmail.com)> wrote:

Hello sir,

Please find below our replies to the comments-

### **1) Main Signage Sample**

- The sides of the letters are made from the Aluminium channel, it is not bent, and due to the light reflection at the top it appears so.
- The face border thickness of these Aluminium channel letters cannot be increased, as it is fixed in size
- The light colour temperature is 3000K Warm white only.

### **2) Roundel Signage**

For this signage, every part is lit up. The letters, lines and the 2 circles as per the intent. Since the background is made up of tiles, at the site it was found during the recce visit that individual wire points could not be provided as per the Projects team. So there are two options as solutions-

Option 1) We provide an MS framing support pipe fabrication behind the letters and lines so that the wiring can be concealed in it(As per the photo shared). The supports can be coated in the same green colour as the background tiles or in grey as per the circles.

Option 2) We provide a full opaque circular type of any coloured background behind the signage so that the wiring and looping can be concealed. But then, the back green tiles will not be visible behind the signage.

This would be an extra addition to the signage. Please find attached reference images for both options.

Do let us know what should be done, and the green tile colour in case that has to be matched.

Thank you
