Dear Ranjan / Shama

In T2 there is provision of playing ambient music in all areas. We have onboarded a licensed service provider through whom we are able to play different music in each area.

Wanted to check if we have made similar provisions in T1 lounge – if not can we factor it now ?

Regards

AB

Dear Sir,

As per your discussion with Ranjith, We have considered the following requirements in Revised BOQ

1. Lounge will have just one zone – but may have up to 4 speaker circuits.
2. No requirement of BGM or local paging within the lounge.
3. Announcements from airport AFAS based on the zone assignment to be played in the lounge area.

Also we need following items during installation

1. The system will have to be integrated into the current T1 system for which we may need access to the Vocia configuration file done by the incumbent implementation partner.
2. The new Vocia components has to be on the same VLAN of the existing T1 PA system.

3. Installation, testing, configuration and message playback into the lounge zone will be in our scope.

Thanks & Regards

Sachin Mahadik
