Dear Haneen
Please find enclosed revised power layout and equipment list in which fire extinguishers have been added.

Dear Ebrahim
Once we get approval from brand please share the same with Trupti for uploading in safal.

Regards
Khushbu

Hi Khushbu

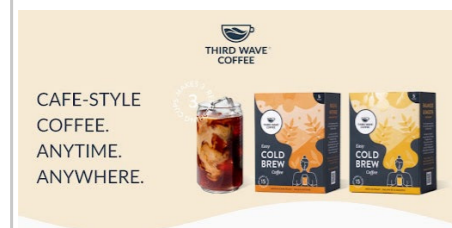

PFA the equipment list.

Also note that we will require an additional electrical point next to the sink for the tap sensor.

Thanks and Regards,

Hi Khushbu,

PFA comments -

1. Feasibility of Internal partitions for the IT cabinet to be checked after IT wiring, stabilizer, UPS etc have been placed.
2. Singular spot lights have been proposed for the bar. I am not confident that this will provide sufficient task lighting for the team. Can we look at having track lights or spots at more frequent intervals?
3. Kindly ensure sufficient clearance is left for accommodation of the bubble taps
4. In the elevation, we can replace the signage on the upright chiller partition to a neon sign to bring in more interest to the space. Few possible options attached.
5. Materials and paint codes are good to go barring the Overhead storage fluted panel. Instead of this being in paint, can we have grooved veneer or laminate?

MEP Comments -

- Raw power not required for pos. RO and geyser point not required as well as this is a dry store.
- Relocate the upright chiller power point from back counter to front counter near upright chiller +freezer equipment.
- Provide one data point near electrical panel,
- One camera required above the POS.
- One ups power and data point required for merry chef KOT (location near merry chef)
- We are using one blender, remove the second blender power point.
- Two power point required near packing machine (location near cbs station)
- The bubble trap pump required power point in front and back counter.

Please share the Electrical sld, load balance sheet

Thanks and Regards,

Hello Prakash,

The layout considered is incorrect. Re-sharing the layout considering the dry store.

Also, to reiterate as discussed with Shashankh Sharma, we will be going ahead with only 1 ice machine of 55kgs as of now and only space provision to be kept for the 2nd ice machine. The 2nd machine will be installed as per future requirement, depending on demand.

Also, please do share a finishes moodboard/docket to understand the look and feel of the space.

Thanks and Regards,

Haneen Noor

Dear Haneen,

Since it is a dry outlet, there is no need to raise the floor. The attached drawing has been revised according to your comments. Additionally, I am sending you the CAD file. If any minor changes are needed, please make the necessary adjustments, and share the updated file

Thanks
Prakash Mistry

Hi Prakash,

Apologies for the delayed response. I have attached the revised layout considering this to be a dry store. The internal partitions etc have changed due to the introduction of the Bubble taps.

Points to note in addition to the remarks attached in the initial drawing set-

1. Ice machine with bubble tap will not fit under the counter
2. HW+BPR Sink to be customized with a removable drum to collect any waste water which can be disposed of at regular intervals.
3. Is there any additional storage space available for us as our U/C storage is affected due to bubble taps?
4. Also the ht of the counters will be 150(floor raise)+940 (counter ht)
5. Reference drawing for the counter elevation and section has been attached. POS and bins section is incorrect. Where the bins are coming, we will not have the base ply.
6. **A render of the kiosk is required for us to understand all the finishes and structure design.**

Thanks and Regards,

Haneen Noor
